SEWING DESCRIPTION

- Use ballpoint needle: If the needle point is sharp it can damage the fabric. The ballpoint needle features a rounded one.
- Use over lock stitch to finish side seam. This type of stitch will let your fabric stretch along the seam.
- Join the pieces by using a flatlock or zigzag stitch for comfort and flexibility.
- Finish bottom hem with a coverstitch or zigzag stitch to maintain stretch and prevent rolling.
- Choose Polyester Thread instead of cotton thread. The polyester thread has a slight amount of stretch.
- Do not stretch the fabric when cutting. Put your stretch fabric on a table or floor without hanging edges and only after that cut it.
